

COMPANY PROFILE

A constant in worldwide logistics - From seaport to logistics services

As part of an extensive restructuring in the mid 1990s, BLG transformed from a local port handling company in Bremen and Bremerhaven to an international logistics service provider. The company thus responds to the requirements of globalisation, which gained dramatically in momentum with the political and economic opening-up of Eastern Europe and other parts of the world. The successful development is based, on the one hand, on the expanded and constantly further developing logistical know-how, and on the other, on the strategic decision to strengthen logistical performance and geographic range with joint ventures, co-operations and strategic alliances. The BLG LOGISTICS GROUP AG & Co. KG, with a number of subsidiaries and holding companies on several continents, was thus created from 1998 out of the BREMER LAGERHAUS-GESELLSCHAFT -Aktiengesellschaft von 1877-
